

Edmonds Ferry National Mussel Watch Site (PSEF), mid-intertidal summertime photo series, 2007 to 2012. Mussels (black objects) appeared in easily-collectable sizes and numbers in 2007 and 2008, declined in 2010-2012. Popweed (*Fucus spp.*) appeared in 2009. Barnacles (white growths) dominated cover in all years. Alan Mearns, NOAA.
